

SCIZYME

CONTROL AMMONIA AND ODORS THE NATURAL WAY

Fair Arenas Cool Rooms Cages & Kennels Barns & Stalls Petting Areas
 Bedding Areas Holding Pens Trucks & Trailers Garbage & Compost Waste

SciZyme is a safe and highly effective enzyme capable of reducing ammonia & odors from animal waste. Its bio-enzyme microbes, when wet, consume the organic waste and reduce or eliminate the source of odor. **SciZyme** just helps speed up its own process with enzymes that create odorless waste.

SciZyme is easy to use in ready to use or concentrate. Simply spray or mop the area. And **SciZyme** is safe for both people and animals, including small pets.

General Directions for bedding areas, holding pens, trucks and trailers, arenas: Spray liberally on and around the entire area; concentrate on urine and manure areas. Allow area to air dry.

For heavily soiled areas: completely saturate area to be cleaned. Scrub area or allow to soak.

USDA Approved
