Made With  
Absorba - Fresh  
Technology

**ShowBed Soft** Livestock Bedding is the perfect bedding for stalls, arenas petting areas, sales rings and cages and makes unique colored bedding at fairs and other events where a little dressing up makes all the difference.

**ShowBed Soft** is the newer softer version of our original **ShowBed** that has been featured at major state fairs in the arenas and livestock bedding areas. If you need to hear more from actual users, testimonials and references are available.

Are you looking for a great new idea to make your fair displays look and feel nicer? **ShowBed Soft** is perfect for enhancing your animals for sales, competition or other recreational events. Colorful **ShowBed Soft** is available in colorfast green, burgundy and purple.

**ShowBed Soft**  
is Used With:

Cattle  
Horses  
Sheep  
Goats  
Pigs  
Ducks  
Poultry  
Alpacas  
Other Large &  
Small Animals

Manufactured from recycled cardboard, **ShowBed Soft** is safe and environmentally friendly. Available in 40 pound bags.

## Colored Bedding For Livestock, Fairs and Displays

### Recommended Instructions:

---

**Arenas:** We suggest using between 1-1 ½ lbs per square foot in a livestock arena. This will provide you with a base approximately 2-3" in depth and will become much more stable once it has been sprayed with water. Even though **ShowBed Soft** is very low in dust, watering will virtually eliminate the dust and make for a very clean environment.

Keep in mind that **ShowBed Soft** will absorb approximately 150% of its own weight in water. *Because the pellets are already softened watering may not be required which would prolong the life of the bedding.* If watering is required, using a normal water sprinkler is an easy and inexpensive way to water. Just turn it on and walk away.

---

**Bedding Areas:** Bedding of animals requires approximately 3 lbs/square foot. This will give you about 6" of bedding. Replacement bedding for a 4 day fair should be about 25% of the initial bedding. Do not water stalls and bedding areas.

---

**Cages:** For smaller animals and fowl, we recommend the use of approximately 1" in the bottom of the cage. Having a tray or lip around the bottom of the cage will help hold **ShowBed Soft** inside the cage.

**Low Lying Areas that Hold Water or Mud:** To eliminate muddy or wet areas, simply pour **ShowBed Soft** in the problem areas. It will absorb the excess moisture and provide a firm footing for people and animals to walk.

---

**Cleaning:** **ShowBed Soft** should be spot cleaned on a regular basis to remove manure and urine contaminated bedding. Regular narrow tined bedding forks with less than ½" space between forks work the best for cleaning. Loose manure from dairy cattle sometimes requires a shovel for more thorough cleaning.

---

### Odor Control Using SciZyme:

**ShowBed Soft** is designed to control odors such as urine and ammonia.

**SCIZYME**

For more heavily used or soiled areas we strongly recommend the use of SciZyme. This enzyme spray will naturally help remove the odors from animal urine and manure while also providing a fresh smell that is very pleasing to both your exhibitors and spectators.
